## 🧠 Skills

Core Java | Spring Boot |  
HTML, CSS, Java Script | Maven |  
React JS | Mongo DB

## 🎓 Education

**Batchelor in Technology,  
Haldia Institute of Technology**

Aug 2018 – Jun 2022 | Haldia

I did B.Tech in **Computer Science  
and Engineering** from this  
Institute under MAKAUT  
University.

**Higher Secondary, WBBSE**

Midnapore

I did my Higher Secondary from Sri  
Narayan Vidyabhaban Boys' High  
School through WBCHSE Board.

## 🌐 Languages

## 👛 Professional Experience

**Cognizant Technology Solution,  
Junior Software Developer**

Jul 2022 – present | Kolkata, India

- Worked on different training modules and case-studies based on Spring Boot to create Microservices and React JS to develop user friendly UI.
- Worked on connecting backend with frontend and unit testing.
- Worked in Agile environment and attended daily standup calls and meetings.

**Cognizant Technology Solution, Intern**

Feb 2022 – Jul 2022 | Kolkata, India

- Participated in a six months Internship program for Cognizant Digital Engineering FSE domain.
- During Internship I have undergone a training on Java, Spring Boot, RDBMS, HTML, CSS, Java Script, React JS, Cloud(Azure) and trained to create a Full-stack application.

## 📁 Projects

**HealthCare Inventory Management System** 🔗

**Objective:** The "Healthcare Inventory Management System" project aims to develop an efficient solution for managing medical supplies and equipment within healthcare facilities. This involves creating a backend using Spring Boot for inventory management and a user-friendly frontend using React JS.

**Technology Used:** Java, Spring Boot, Maven, Mongo DB, React JS, Azure

**KP Member Registration Portal**

**Objective:** Build an web app which can help KP member to assign caregiver(members only) for themselves. It provides facilities like member registration, login, search caregiver, assign caregiver to the user. I have used React JS to design a web app which is connected to the backend H2 database using spring boot framework.

**Technology Used:** Java, Spring Boot, Maven, H2 Database, React JS.

## 📄 Certificates

**Azure Fundamentals(AZ-900)**

Demonstrate foundational knowledge of cloud concepts, core Azure services, plus Azure management and governance features and tools.
